**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 12-13, 26-28 & 33-34, drawn to an isolated immortal and multipotent neural cell line.

Group II, claim(s) 5, drawn to an isolated cell or tissue derived from multipotent neural cell line.

Group III, claim(s) 6-11, drawn to a transfected multipotent neural cell.

Group IV, claim(s) 14-21, drawn to a method of identifying multipotent cells comprising measuring various antigens.

Group V, claim(s) 22, drawn to a method of purifying a multipotent neural cell.

Group VI, claim(s) 23-25 & 29-31, drawn to a method of enriching a population of multipotent fetal neural cells.

Group VII, claim(s) 32, drawn to a method of treating a mammal having a neurological syndrome or disease comprising implanting a multipotent neural cell.

Art Unit: 1647

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I is directed an isolated immortal and multipotent neural cell line, which is the first product. However, because Major et al (US Patent 5,753,491) teach a CNS immortal and multipotent neural cell line, which meets the recited claim limitations, no special technical feature exists for Group I as defined by PCT Rule 13.2, because it does not define a contribution over the prior art. Groups II-III are drawn to a structurally different product, which do not share the same or a corresponding technical feature. The technical features of Groups IV-VII are drawn to methods having different goals, method steps and starting materials, which do not require each other for their practice and do not share the same or a corresponding technical feature. Note that PCT Rule 13 does not provide for multiple products or methods within a single application. Because the technical feature of Group I is not a special technical feature, and because the technical features of the Group II-VII inventions are not present in the Group I claims, unity of invention is lacking.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1647

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Robert Hayes whose telephone number is (571) 272-0885. The examiner can normally be reached on Monday through Thursday, and alternate Fridays, from 8:30 AM to 5:30 PM.
